EDUCATION

- 2009 – 2014 Ph.D. in Neuroscience; Minor in Statistics
The University of Arizona, Tucson, AZ
Thesis title: “Neurons in the monkey amygdala detect eye contact during naturalistic social interactions.”
Advisor: Dr. Katalin M. Gothard
Committee: Andrew J. Fuglevand, Konrad Zinsmaier, Joseph C. Watkins
- 2004 – 2009 B.S. in Health Sciences, Physiology (*Honors, Summa Cum Laude*)
B.S. in Mathematics, Minor: Chemistry (*Summa Cum Laude*)
The University of Arizona, Tucson, AZ
Honors thesis: “Behavioral triggers of skin conductance and their neural correlates in the primate amygdala.”

CURRENT POSITION

- 2021 – present Lead Scientist and Manager of Neurotechnology
Emerging and Creative Technologies
Warner Bros Discovery, Los Angeles, CA

PROFESSIONAL HISTORY

- 2020 – 2021 Project Scientist
Rutishauser Lab, Cedars-Sinai Medical Center, Los Angeles, CA
- Published original research on how neurons in the subthalamic nucleus participate in cognitive control by supporting action selection and cancellation
 - Created machine learning models to optimize electrode placement for deep-brain stimulation
 - Implemented new program to perform deep brain stimulation of the human hippocampus to enhance memory
 - Recorded and analyzed how respiratory rate and Vagal Nerve Stimulation impact cardiac rate and performance on cognitive tasks
 - Currently designing new experiments to probe how single neurons in the brain learn and encode social relationships

2017 – 2020

Postdoctoral Scientist

Rutishauser Lab, Cedars-Sinai Medical Center, Los Angeles, CA

- Presented work at international conferences and published original research on how cardiac pulsation impact neural signaling and cell typing, how dopaminergic neurons in the human brain support memory formation, and how interictal discharges in epileptic patients impact memory
- Performed intracranial neural recordings, cardiac physiology, and respiratory signals, in patients with neurological disorders (Epilepsy, Parkinson's) to understand cognitive and motor functions
- Worked with a team of neurologists, neurosurgeons, and medical staff to obtain IRB approved intraoperative neural data in awake patients
- Learned and implemented advanced computational techniques (e.g., linear SVM)
- Collaborated successfully with researchers at other institutes, manifesting in peer-reviewed publications (e.g. Allen Brain Institute, The University of California Los Angeles)

2016 – 2017

Research Specialist Principal

The Gothard Lab, The University of Arizona, Tucson, AZ

- Developed a research program to understand how the associative areas of primate brain process and interpret multimodal signals in the visual, auditory, and tactile domain
- Published original research on how neurons in the monkey amygdala process somatosensory signals to decode the facial expression the animal is displaying
- Introduced a new method for delivering somatosensory stimulation (air puff) in a highly controlled and temporally-specific manner amenable to single neuron analysis
- Examined how leeches could be used to draw blood to test for hormone levels in macaques

2015 – 2016

(+ freelance to 2018)

Lead Psychophysiology Researcher

MediaScience Consumer Neuroscience Research, Austin, TX

- Analyzed and interpreted biometric data (heart rate, skin conductance) and eye-tracking to determine how different advertising strategies impact emotion and memory (clients: Facebook, ESPN, Netflix, Hulu)
- Established best practices for calculating electrodermal responses and managed a team of employees on collecting and preparing psychophysiology data
- Interfaced with clients on data methodologies and interpretation of results
- Obtained certification in Paul Ekman facial action coding

2014 – 2015

Postdoctoral Research Fellow

Peter Rudebeck Lab

Icahn School of Medicine at Mount Sinai, New York, NY

- Designed and conducted original experiments on the neural basis of emotional decision-making
- Recorded neural activity (EEG, single neurons) and the emotional state (eye-movements, pupil diameter, heart rate) of monkeys engaged in a decision-making task to probe how arousal is maintained in anticipation of reward

25th July, 2023

- Planned and taught a masters-level course in biostatistics
- Presented research findings at international conferences
- Peer-reviewed scientific manuscripts for publication in The Journal of Comparative Psychology

2009 – 2014

Graduate Research Assistant
Katalin Gothard Lab

Department of Neuroscience, The University of Arizona, AZ

- Published original research on how primates interact socially, guide their attention to socially relevant stimuli, and how neurons in both humans and monkeys respond when fixating with eye-movements on socially relevant stimuli
- Developed a system for monitoring the eye-movements and facial muscle activity of Rhesus monkeys
- Established protocols for eliciting natural behaviors in laboratory settings using wildlife video stimuli
- Created an image database of macaque facial expressions and participated in the creation of the Macaque Facial Action Coding System
- Communicated scientific findings to popular science audiences
- Designed user-friendly programs for conducting social research

2009 – 2012

K-12 science outreach instructor
Science Foundation Arizona

- Designed and taught original lesson plans for K-12 classrooms; Attended education workshops and learned K-12 teaching strategies
- Developed and implemented neuroscience K-6 outreach activities (e.g skin conductance lie-detector test, facial electromyography monitoring)
- Served as neuroscience guest-lecturer in high school classrooms

2006 – 2009

Undergraduate research assistant
Gothard Lab, Undergraduate Biology Research Program
The University of Arizona, Department of Physiology

- Recorded skin conductance responses from Rhesus monkeys as they viewed emotionally-salient photographs
- Hand-scored saccadic eye-movements and analyzed looking patterns using custom-designed MatLab software
- Participated in a summer abroad program investigating the role of sleep-spindles in memory consolidation in the monkey amygdala

HONORS AND AWARDS

2020	Malaniak Award for Excellence in Postdoctoral Research, Cedars-Sinai
2013	Galileo Circle Scholar, The University of Arizona College of Science
2011-2012	K-12 Teaching Fellowship, Science Foundation Arizona
2010	Faculty of 1000 Award for Scientific Poster Presentation
2009 – 2012	National Science Foundation Graduate Research Fellowship
2009 – 2012	Arizona Science Foundation Graduate Research Fellowship
2009 – 2010	Graduate Diversity Fellowship, The University of Arizona
2006 – 2009	Undergraduate Research Fellowship, Undergraduate Biology Research Program, The University of Arizona
2008	Biomedical Research Abroad: Vistas Open Fellowship

25th July, 2023

Weizmann Institute, Rehovot, Israel
2004 – 2008 Baird Foundation Scholarship, The University of Arizona
2004 – 2008 President’s Award for Excellence, The University of Arizona
2004 – 2008 Provost Scholarship, The University of Arizona
2004 – 2009 Highest Academic Distinction, The University of Arizona

SERVICE & OUTREACH

2019 – present Letters to Prescientist STEM mentor
2017 – 2018 Information Specialist at Los Angeles LGBT Center
2014 – 2015 New York Cares, Instructor of Computer Course for Senior Citizens
2013 – 2014 Adult literacy and English language tutor at Literacy Connects, Tucson AZ
2012 Neuroscience lecturer at Marana High School
2012 Neuroscience outreach volunteer at the Tucson Festival of Books
2012 Volunteer science instructor at Senita Valley Elementary School
2011 - 2012 The University of Arizona Optics Department Laser Fun Day
2011 Science Foundation Arizona Private Eye 5th grade teacher
2008 Brain Awareness Week, Society for Neuroscience Tucson Chapter

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

2006 – present The Society for Neuroscience
2014 – 2015 New York Academy of Sciences
2012 – 2015 The Society for Social Neuroscience

SCHOLARLY PRESENTATIONS

16 Nov. 2021 Society for Motion Picture and Television Engineers Annual Technical Conference (*Online*), Los Angeles, CA. “Using Biometric Singals to Improve Storytelling.” (organizer: SMPTE)
26 Jan. 2021 Cedars-Sinai Medical Center (*Online*), Malaniak Award for Postdoctoral Excellence, Los Angeles, CA. “Neurons in the ventral subthalamic nucleus of the human brain support action cancellation.” (organizer: Odelia Cooper)
13 Nov. 2020 California Institute of Technology (*Online*), Human Single Neuron Meeting, “Distinct roles of dorsal and ventral subthalamic nucleus in action selection and action cancellation.” (organizer: Human Single Neuron Committee)
03 Nov. 2020 Cedars-Sinai Medical Center, Neurology and Movement Disorders Seminar, Los Angeles, CA. “Distinct roles of dorsal and ventral subthalamic nucleus in action selection and cancellation.” (organizer: Michele Tagliati)
23 August 2019 The University of Michigan, Department of Anesthesiology, Anne Arbor, MI. “Cardiac-related modulation of the extracellular action potential waveform in vivo reveals multiple cell classes in human hippocampus.” (organizer: Kamran Diba)
06 June 2019 University of California Davis, National Primate Research Center, Davis, CA. “Neurons in the amygdala support social communication among primates.” (organizer: Eliza Bliss-Moreau)
02 Nov. 2016 Cedars-Sinai Medical Center, Department of Neurosurgery, Los Angeles, CA. “Social communication among primates activates neurons in the amygdala.” (organizer: Ueli Rutishauser)
25 Feb. 2015 Mount Sinai School of Medicine, Comparative Cognition Group, New York, NY. “Social communication among primates activates neurons in the amygdala.” (organizer: Pete Rudebeck)
08 April 2014 The University of Arizona, Quantitative Biology Seminar, Tucson, AZ,

25th July, 2023

- 14 Feb. 2014 “Quantifying how the primate brain supports social behavior” (organizer: Joseph Watkins)
The National Institute of Mental Health, Laboratory of Neuropsychology, Bethesda, MA. “Neurons in the monkey amygdala mediate communication with facial expressions.” (organizer: David Leopold)
- 26 Nov. 2013 California Institute of Technology, Department of Neurobiology, Pasadena, CA. “Neurons in the monkey amygdala mediate communication with facial expressions.” (organizer: Doris Tsao)
- 02 May 2013 The University of Arizona, Department of Physiology, Tucson, AZ. “Single unit activity in the amygdala during the production of facial expressions.” (organizer: Ralph Fregosi)
- 13 April 2012 The University of Arizona, Department of Physiology, Tucson, AZ. “The amygdala evaluates and regulates social behavior in monkeys.” (organizer: John Allen)
- 19 March 2012 Cognitive Neuroscience Seminar, The University of Arizona, Tucson, AZ. “The amygdala evaluates and regulates social behavior in monkeys.” (organizer: Lynn Nadel)
- 16 May 2011 The University of Arizona, Undergraduate Biology Research Program Orientation, Tucson, AZ. “The neural bases of primate emotional and social behavior.” (organizer: Carol Bender)
- 25 Jan. 2011 The University of Arizona, Neuroscience Community Datablitz, Tucson, AZ. “Eye movements during movie viewing attests to social perception in monkeys.” (organizer: Carol Barnes)
- 25 Oct. 2008 The University of Arizona, Undergraduate Research Abroad Datablitz, Tucson, AZ. “How does the amygdala participate in emotional memory consolidation during sleep?” (organizer: Carol Bender)

TEACHING

- Sept. – Dec. 2015 Introduction to Biostatistics, MPH 0300, Icahn School of Medicine at Mount Sinai, New York
- Aug. – Dec. 2011 Teaching Assistant, MATH 303: Introduction to Statistical Methods, Dr. Joseph Watkins, The University of Arizona. syllabus: <http://math.arizona.edu/~jwatkins/math363f14s.htm>

MENTORING

Programs

Mahider Gessesse, California Institute of Technology, Los Angeles, CA
SURF Program mentor (2020-2023)

Adishree Ghataree, California Institute of Technology, Los Angeles, CA
SURF Program mentor (2021)

As a senior lab member

Sarita Tamang, Mt. Sinai Hospital, New York, NY

Jeremiah K. Morrow, The University of Arizona, AZ

Michelle Mangana-Mendoza, The University of Arizona, AZ

Kayven Farshad, The University of Arizona, Tucson, AZ

Miranda Andersen, The University of Arizona, Tucson, AZ

Susma Ghimere, The University of Arizona, Tucson, AZ

Gabby Lacy, The University of Arizona, Tucson, AZ

RELATED SKILLS

Certifications

Facial Action Coding System, Certified by Paul Ekman Group

Graduate Certificate in Statistics

Software Proficiencies

MatLab, Python, Psychtoolbox, Qualtrics, SurveyMonkey, Neurobehavioral Systems Presentation, MonkeyLogic, iMotions, CED Spike 2, Plexon, AlphaOmega Neuro Omega, Neuralynx, CorelDraw, Adobe Illustrator, Adobe Premiere

Hardware Proficiencies

EyeTracking (ISCAN, Arrington, Tobii, Seeso), Acute Single Unit Recording (Thomas Eckhorn Drive, NAN), Data Acquisition (CED 1401, Neuralynx), Skin Conductance (PsychLab, BioPac, Shimmer, CED Skin Conductance Unit), EKG Photoplethysmography and Electromyography (Grass Amplifier, BioPac), Local Field Potential (Neuralynx)
